**Union system for self-certification of importers of certain minerals and metals originating in conflict-affected and high-risk areas \*\*\*I**

Amendments adopted by the European Parliament on 20 May 2015 on the proposal for a regulation of the European Parliament and of the Council setting up a Union system for supply chain due diligence self-certification of responsible importers of tin, tantalum and tungsten, their ores, and gold originating in conflict-affected and high-risk areas (COM(2014)0111 – C7-0092/2014 – 2014/0059(COD))<sup>1</sup>

(Ordinary legislative procedure: first reading)

**Amendment 1**

**Proposal for a regulation**

**Recital 1**

*Text proposed by the Commission*

(1) Natural mineral resources in conflict-affected or high risk areas – although holding great potential for development – can be a cause of dispute where their revenues are fuelling the outbreak or continuation of violent conflict, undermining *national* endeavours towards development, good governance and the rule of law. In these areas, breaking the nexus between conflict and illegal exploitation of minerals is critical *to* peace and stability.

*Amendment*

(1) Natural mineral resources in conflict-affected or high risk areas – although holding great potential for development – can be a cause of dispute where their revenues are fuelling the outbreak or continuation of violent conflict, undermining endeavours towards development, good governance and the rule of law. In these areas, breaking the nexus between conflict and illegal exploitation of minerals is *a* critical *element in guaranteeing* peace, *development* and stability.

*Amendment*

***(5a) This Regulation is one of the ways of eliminating the financing of armed groups by means of controlling trade of minerals from conflict regions; this does not alter the fact that the European Union's foreign and development policy actions should focus on countering local corruption and the porosity of borders, and on providing training for local populations and their representatives in order to highlight abuses.***

(7) On 7 October 2010, the European Parliament ***passed a Resolution calling for*** the Union to legislate along the lines of the US 'conflict minerals' law alias Section 1502 of the Dodd-Frank Wall Street Reform and Consumer Protection Act; and the Commission announced in its Communications of 2011 and 2012 its intention to explore ways of improving transparency throughout the supply chain, including aspects of due diligence. In the latter communication and in line with the commitment it had made at the May 2011 OECD Ministerial Council, the Commission also advocated greater support for and use of the OECD Guidelines for Multinational Enterprises, and of the OECD Due Diligence Guidance – even outside the OECD membership.

### Proposal for a regulation

#### Recital 8

##### *Text proposed by the Commission*

(8) Union citizens and civil society actors have raised awareness with respect to companies operating under the Union's jurisdiction for not being held accountable for their potential connection to the illicit extraction and trade of minerals from conflict regions. The consequence is that such minerals, potentially present in consumer products, link consumers to conflicts outside the Union. To this end, citizens have requested, notably through petitions, that legislation be proposed to the European Parliament and the Council holding companies accountable under the Guidelines as established by the UN and OECD.

##### *Amendment*

(8) Union citizens and civil society actors have raised awareness with respect to companies operating under the Union's jurisdiction for not being held accountable for their potential connection to the illicit extraction and trade of minerals from conflict regions. The consequence is that such minerals, potentially present in consumer products, link consumers to conflicts outside the Union. ***As such, consumers are indirectly linked to conflicts that have severe impacts on human rights, notably the rights of women, as armed groups often use mass rape as a deliberate strategy to intimidate and control local populations in order to protect their interests.*** To this end, citizens have requested, notably through petitions, that legislation be proposed to the European Parliament and the Council holding companies accountable under the Guidelines as established by the UN and OECD.

### Proposal for a regulation

#### Recital 9 a (new)

##### *Text proposed by the Commission*

In line with the nature of due diligence, the individual due diligence obligations contained in this Regulation should reflect the progressive and flexible nature of due diligence processes, and the need for obligations that are appropriately tailored to enterprises' individual circumstances. ***(11b) Many existing supply chain due diligence systems could contribute to achieving the aims of this Regulation. There already exist industry schemes aimed at breaking the link between conflict and the sourcing of tin, tantalum, tungsten and gold. Those schemes use independent third-party audits to certify smelters and refiners with systems in place to ensure responsible sourcing of minerals only. Those industry schemes could be recognised in the Union system. However, the criteria and procedures for such schemes to be recognised as equivalent to the requirements of this Regulation need to be clarified to allow for respect for high standards and the avoidance of double auditing.***

SMEs established in the Union which import minerals and metals and which establish due diligence systems should receive financial aid through the Commission's COSME programme.*

## Amendment 12

### Proposal for a regulation Recital 12 a (new)

*Text proposed by the Commission*

*Amendment*

*(12a) Companies established in the Union operating downstream of the supply chain that voluntarily establish a responsible sourcing system for minerals and metals should be certified by the Member States' competent authorities by means of a label. The Commission should rely on the OECD Due Diligence Guidance to set out the criteria for the granting of certification and, to that end, may consult the OECD Secretariat. The conditions for granting the 'European certification of responsibility' should be as stringent as those required by the OECD certification system. Companies benefitting from the 'European certification of responsibility' are encouraged to indicate this fact on their website and to include it in the information given to European consumers.*

(13) Smelters and refiners are an important point in global mineral supply chains as they are typically the last stage in which due diligence can effectively be assured by collecting, disclosing and verifying information on the mineral's origin and chain of custody. After this stage of transformation it is often considered unfeasible to trace back the origins of minerals. A Union list of responsible smelters and refiners could therefore provide transparency and certainty to downstream companies as regards supply chain due diligence practices.

##### *Amendment*

(13) Smelters and refiners are an important point in global mineral supply chains as they are typically the last stage in which due diligence can effectively be assured by collecting, disclosing and verifying information on the mineral's origin and chain of custody. After this stage of transformation it is often considered unfeasible to trace back the origins of minerals. ***The same applies to recycled metals, which have undergone even further steps in the transformation process.*** A Union list of responsible smelters and refiners could therefore provide transparency and certainty to downstream companies as regards supply chain due diligence practices. ***In accordance with the OECD Due Diligence Guidance, upstream undertakings such as smelters and refiners should undergo an independent third-party audit of their supply chain due diligence practices, with a view to also being included in the list of responsible smelters and refiners.***

***Representative of the Union for Foreign Affairs and Security Policy committed to the implementation of accompanying measures leading to an integrated EU approach to responsible sourcing in parallel with this Regulation, with the aim not only of reaching a high level of participation by companies in the Union system provided for in this Regulation but also ensuring that a global, coherent and comprehensive approach is taken to promote responsible sourcing from conflict affected and high-risk areas.***

## **Amendment 60**

### **Proposal for a regulation Article 1 — paragraph 1**

#### *Text proposed by the Commission*

1. This Regulation sets up a Union system for supply chain due diligence ***self-certification*** in order to curtail opportunities for armed groups and security forces<sup>12</sup> to trade in tin, tantalum and tungsten, their ores, and gold. It is designed to provide transparency and certainty as regards the supply practices of importers, smelters and refiners sourcing from conflict-affected and high-risk areas.

## **Amendment 154**

### **Proposal for a regulation**

## Article 1 – paragraph 2

*Text proposed by the Commission*

2. This Regulation lays down the supply chain due diligence obligations of Union importers who ***choose to be self-certified as responsible importers of minerals or metals containing or consisting of tin, tantalum, tungsten and gold, as set out in Annex I.***

*Amendment*

2. This Regulation lays down the supply chain due diligence obligations of ***all*** Union importers who ***source minerals and metals falling within the scope of this Regulation, in accordance with the OECD Due Diligence Guidance. That guidance is designed to guarantee transparency and traceability in respect of importers’ sourcing practices in conflict-affected or high-risk areas, in order to minimise or prevent violent conflicts and human rights abuses by curtailing the opportunities for armed groups and security forces, as defined in Annex II to the OECD Due Diligence Guidance, to trade in those minerals and metals.***
